

FARO
The Measure of Success

30% more accurate!
The brand new
Quantum FaroArm
& **Laser Line Probe**

FaroArm

FARO UK is pleased to invite you to Autosport Engineering and Manufacturing Technology which will be taking place at Birmingham from 10th - 11th January 2008.

During the event you will see demonstrations of the Quantum FaroArm, the Fusion FaroArm as well as the new Laser ScanArm, FARO Gage & Gage Plus, FARO PowerGage and FARO Laser Scanner.

Date & Time: 10th & 11th January 2008 * 9:00am - 6:00pm

Location: NEC, Birmingham, Stand E530

To receive more information fill in and send us the response form or alternatively contact us on 00 800 3276 7253 or Steven.Nutt@faro-europe.com.

More information on the exhibition is available at www.autosport-international.com.

We look forward to welcoming you at our booth.

Kind regards,

David Southam | Eugene Richer | Steve Whalley | Neil Barnett

Quantum FaroArm

Laser ScanArm V3

The **Quantum FaroArm®** is the ideal tool for completing surface measurements and dimensional calculations to the highest degree of accuracy. Perform CAD analysis, inspections and alignments with ease and precision. This is the first 8-foot portable measurement arm certified to .0007" (.018mm) accuracy.

The **Fusion FaroArm®** is FARO's new cost-effective measurement arm. With its high precision and low-cost it is the affordable solution for most of your measurement needs on the shop floor.

The new **FARO Laser ScanArm V3** offers 30% more accuracy and 33% less weight. It is perfect for reverse engineering and can inspect to CAD and records more than 19,000 points per second.

FARO Gage & Gage-PLUS: The world's first personal CMM with accuracies up to ± 0.005 mm. With their 1.2m working volume they are the "mount to where you make it", truly portable, cost effective, 3-Dimensional gage.

FARO PowerGAGE: The only portable device that enables manufacturers to verify that a part meets the CAD file's specs to within .005mm right on the manufacturing machine.

FARO Laser Scanner: A portable non-contact measurement system to accurately capture measurements. The system rotates 360° and automatically measures everything within the line of sight from the scanner's position up to 76m away.

FARO Laser Tracker: A portable 3D measurement system for large volume which uses laser technology and XtremeADM to effectively and accurately measure large parts, tooling and machinery with a 70m diameter and 0.025mm accuracy.

HOW TO GET THERE

By Rail

London is only 80 minutes away from Birmingham International Station, which itself is linked to the NEC. Trains also run directly to many regional towns and cities. And it takes only ten minutes to travel by rail into Birmingham New Street, the UK's largest interchange station.
 >> National Rail Enquiries: www.nationalrail.co.uk.

By Road

The NEC is at the hub of the UK motorway network, enabling visitors to travel directly there from the M6, M1, M40 and M42. There's car parking on-site for 21,000 vehicles and 150 coaches, with a complimentary shuttle bus service taking visitors to the Piazza and Atrium entrances.
